PROFESSIONAL SKILLS

UI/UX Design	<div></div>
HTML5	<div></div>
CSS3	<div></div>
JavaScript	<div></div>
Responsive Web	<div></div>
REST / JSON	<div></div>
C# / ASP.NET	<div></div>

ABOUT ME

I am passionate about technology in all of its various forms. From running a large network of Bitcoin miners, building go-karts and electric scooters, to converting a 40-foot school bus to a mobile office and RV for the family. I am exceptionally skilled across the full stack of software development and Internet of Things (IoT) devices.

I take pride in transforming complex challenges into simple and elegant solutions, while maintaining an intuitive user experience. I can focus on the big picture while pacing myself and teams through the iterative development process, ensuring stable and extendable solutions.

EDUCATION

Business Management
University of Phoenix

2002 – 2003

Robotics & Fabrication, Software Engineering
Modesto Junior College

1992 – 1994

BUZZWORTHY

Graduated high school early

Graduated high school at 15 years old and started attending college.

Essential C#

One of the technical editors of (three editions of) the Essential C# book by Mark Michaelis.

Patent #8,275,895

Steve Ellis and I are co-authors of "DHCP – Systems and methods for establishing a trusted dynamic host configuration protocol connection."

WORK EXPERIENCE

Vutiliti, Inc.

2015 – Present

Web Architect

Created responsive, mobile-first website using Angular.js and back-end services in Go. Worked with partners to solve enterprise issues using custom hardware and software designs to save companies money.

ConsultNet

2013 – 2016

Web Architect (Consultant)

Created responsive websites using Angular.js, Node, Meteor, PhoneGap, Ember.js, and ASP.NET MVC while constantly adjusting to different teams and environments.

Venafi, Inc.

2008 – 2013

Web Architect

Led a team of six developers in the design and implementation of a complete web-based Certificate management console for Fortune 100 companies. It was completely extendable with over 130 plugins.

OneGreatFamily.com

2006 – 2008

Web Architect

Led a team of four developers in creating a web-based genealogy website, including an online family tree, extensible dashboard, and widgets.

LANDesk Software, Inc.

2003 – 2006

Senior Software Engineer

As part of the ISV team I created various solutions based on customer need, so I was able to work in different areas of development. From Classic ASP to ASP.NET, and Windows CE/Mobile (C++) and BlackBerry (J2ME) devices. Created LANDesk Message-based SDK and Handheld Manager (which had over 1 million client installs).
